

Bundled Services

Priority Access T1 Bundled With Enterprise Seats or IPTrunks.

The Top Line. Here is a suite of bundled services for small and medium-sized businesses (SMBs), from Priority Access T1 offering Quality of Service (QoS) bundled with Enterprise Seats or the choice of IPTrunking options bundled with the same Priority Access T1.

Enterprise Seats Bundle Services

If you run a small or medium-sized business and need prioritized voice and data traffic at T1 speeds (1.544 Mbps) to be paired with Hosted Enterprise Seats, Enterprise Bundle Services may be the right move for you. Two Enterprise Bundled services are available:

1. Enterprise Standard Bundle - Includes three (3) Hosted Enterprise Seats and one (1) Enterprise Premium Seat plus a very competitive PAT1 access service with Quality of Service (QoS). The Enterprise Standard Bundle offers attractive term discounts and includes the same feature set and usage plan as an Enterprise Standard seat.
2. Enterprise Premium Bundle - Includes four (4) Hosted Enterprise Premium Seats plus a very competitive PAT1 access service with QoS. The Enterprise Premium Bundle offers attractive term discounts and includes the same feature set and usage plan as an Enterprise Premium seat.

IPTrunking Bundle Services

If you are looking to combine your IPTrunking service with our PAT1 broadband service, IPTrunking Bundle Service is the right move for you. Three (3) IPTrunking Bundle Services are available and each option includes unlimited inbound minutes along with the high speed and QoS transmissions that our PAT1 service provides.

1. IPTrunking Basic Bundle - Includes four (4) IPTrunking Basic Communication channel(s) terminated on a PBX or Keyset at the customer premise plus PAT1 access product with limited calling features. Choice of Two (2) Calling Usage Plans - a flat rate 1000 minutes outbound local and domestic long distance calling plan or an Unlimited outbound local and domestic long distance calling plan.
2. IPTrunking Executive Bundle - Includes of four (4) IPTrunking Executive Communication channel(s) terminated on a PBX or Keyset at the customer premise plus PAT1 access product along with a number of Class 5 calling services and communications management features. The number of DIDs that can be assigned these Executive features equals the number of Executive Trunks purchased. The remaining additional DIDs will include IPTrunking Basic calling features. Choice of Two (2) Calling Usage Plans -- a flat rate 1000 minutes outbound local and domestic long distance calling plan or an Unlimited outbound local and domestic long distance calling plan.
3. IPTrunking Premium Bundle -Includes of four (4) IPTrunking Premium Communication channel(s) terminated on a PBX or Keyset at the customer premise plus PAT1 access product along with a robust number of Class 5 calling services, communications management, and advanced communications automation features. The number of DIDs that can be assigned these Premium features equals the number of Premium Trunks purchased. The remaining additional DIDs will include IPTrunking Basic calling features. Choice of Two (2) Calling Usage Plans - a flat rate 1000 minutes outbound local and domestic long distance calling plan or an Unlimited outbound local and domestic long distance calling plan.

Bundled Services Solution Features

IP Voice for Business - reliable, simple, and affordable IP communications solutions a business needs in order to be competitive today. Businesses can choose a fully hosted IP PBX VoIP services which delivers cost and productivity benefits of a VoIP solution or an IPTrunking VoIP solution, a versatile and cost-effective PBX integration/trunk replacement service that delivers the benefits of VoIP while retaining existing traditional or IPPBX/Key systems.

Priortiy Access T1 - offers high speed transmissions (1.544Mbps) and Quality of Service from end-to-end, creating a "virtual private line" transport for voice and data traffic destined for the Corporate Telecomm nationwide IP network.

Nationwide IP-based Network - purpose built for redundancy, which maximizes reliability. The use of protected, diverse routes and a geographically distributed architecture ensures the orderly management of network traffic at any time and under any conditions. Our redundancy strategy is supported by deploying all software and hardware equipment in paired, redundant configurations such that load-sharing and fail-over mechanisms are in place for any of the SuperPOP locations.
